

Become a Data Entry and Analysis Volunteer!

Posted: 1 August 2024

The vast majority of Watergum projects require a substantial amount of information to be correlated, input into programs, and analysed so we are able to maintain and monitor the growth and success of our programs.

We are seeking a computer literate volunteer to be able to assist us in the following tasks:

- Data entry and analysis for several citizen science research projects
- Data preparation for reporting
- Data preparation mapping

What you need to know

- Time commitment: Flexible, set hours per week or ad hoc if preferred
- Requirements: Must have own transport, experience with Microsoft Excel is compulsory, exposure to programs such as R and Esri is preferred (but not required).
- Skills you will acquire: Experience using a variety of computer software programs, data collection, management and analysis, working in a team environment
- What Watergum offers: a great team environment, support and training opportunities, the chance to gain experience in a dynamic not for profit and contribute to meaningful conservation outcomes.

Please email us at info@watergum.org to express your interest or find out more information.
